	5
1	PROCEEDINGS,
2	(When the proceedings began, there was no
3	audio available.)
4	(Judge Lind is reading from new exhibit.)
5	That will be Appellate Exhibit next in
6	line.
7	MAJOR HURLEY: Court 12 and 6 is the first
8	group.
9	THE COURT: Well, I don't have the exhibit
10	in front of me. The Court Reporter has it.
11	MAJOR HURLEY: I'm sorry.
12	THE COURT: 1, 2 and 6 is the first one. 3
13	and 5 is the second one. Oh, I see. I have got two
14	6's.
15	MAJOR HURLEY: 4 is the second.
16	THE COURT: What I'll do is, let me clarify
17	that. I'll take this ruling back with me and do that.
18	Might be I just made a transposition of numbers. Let
19	me see the exhibit that you initially filed with the
20	objections and maybe I can clear this up now.
21	(Pause)

Major Hurley, I'll confirm with the 1 2 exhibit, but just looking at the ruling, 3 and 5 are 3 Number 2. I think that's right. The one following that is Number 4. I'll double-check with the exhibit. 4 And then it should only be 3 and 5 above. So just 4 5 6 will be separate. Let me double-check. 7 MAJOR HURLEY: (Inaudible.) THE COURT: I'll double-check with the 8 exhibit and confirm and then fix the typo in the ruling and we'll go forward from there. 10 11 So after I fix the typo, we'll have it as 12 the next Appellate Exhibit in line. 13 Here comes the exhibit. The correct one would be 1, 2 and 6. Second bullet would be 3 and 5. 14 The third bullet instead of 6 is 4. And it would be 15 unlike 3 and 5 above. I will fix that and we'll have 16 the correct numbers. Thank you for bringing that to my 17 18 attention. There have been a number of Appellate 19 Exhibits that have been filed since yesterday. Major 20 21 Fein, would you like to set those for us.

```
MR. FEIN: Yes, Ma'am. First, Your Honor,
1
2
    Appellate Exhibit 646 is the Prosecution's request to
3
    substitute photographs of certain physical evidence set
    for trial dated 9 August, 2013.
4
                Appellate Exhibit 647 the Defense's
5
6
    specific objections under RCM 1001(b)(4) for Commander
7
    Aboul-Enein's testimony, dated 8 August 2013.
    Appellate Exhibit 648 is Prosecution's response to the
8
    Defense's specific objections under RCM 1001(b)(4) for
10
    Commander Aboul-Enein dated 8 August 2013.
                THE COURT: Wait a minute. You said
11
12
    Prosecution response to --
13
                MR. FEIN: Prosecution's response to
14
    Appellate Exhibit 647.
15
                THE COURT: My copy has it marked as
16
    Appellate Exhibit 647. Is there something not correct
    about this?
17
18
                MR. FEIN: May I have a moment, Your Honor.
19
                (Pause)
20
                Original has been marked Appellate Exhibit
21
    646, as previously stated, Prosecution's request for
```

1	substitute photographs, physical evidence dated 9
2	August. Appellate Exhibit 647 is the Defense specific
3	objection to RCM 1001(b)(4) for Commander Aboul-Enein
4	Appellate Exhibit 648 is the Prosecution's
5	response to the Defense specific objection under RCM
6	1001(b)(4) for Commander Aboul-Enein. Appellate
7	Exhibit 649 Your Honor, I also missed one Appellate
8	Exhibit 645, Government's motion for appropriate relief
9	from mental health records. That is Appellate Exhibit
10	645.
11	Appellate Exhibit 649 is an email from the
12	Defense to the Prosecution outlining the basis of
13	Commander Ottman testimony. Appellate Exhibit 649
14	THE COURT: Okay. Take a look at my copy.
15	Maybe that was handwritten or something incorrect.
16	MR. FEIN: Yes, Ma'am.
17	THE COURT: I think it's just my copy that
18	was mis-numbered. So we'll change that.
19	Let's begin with the Prosecution's request
20	to substitute photographs for certain physical evidence
21	in record of trial 646. Defense any objection?

1	MR. COOMBS: No, Your Honor.
2	THE COURT: All right. In that case the
3	request to substitute photographs for the physical
4	evidence that is attached, photographs attached is
5	granted.
6	Prosecution response to Defense specific
7	objections under RCM 1001(b)(4) for Commander
8	Aboul-Enein, the Court will take that under advisement.
9	I have the Defense's objections and will issue a ruling
10	probably sometime today.
11	I have the Government motion for
12	appropriate relief mental health records. Appellate
13	Exhibit 645 and Defense's corresponding email. And
14	that was Appellate Exhibit 649.
15	Counsel and I briefly met in an RCM 802
16	conference earlier before coming on the record today.
17	And I believe the parties advised me that what really
18	is at issue here is the, whether the Defense has to
19	produce the long form RCM 706 Form to the Government,

if they call one of their witnesses, Dr. Bolton, on

Wednesday and whether he can testify about certain

20

statements made by the accused. Is that at the end of 1 2 the day the underlying issues? 3 MR. FEIN: Yes, Ma'am. But that's assuming after we confirm with Dr. Bolton that the basis of his 4 testimony is what has been provided and we get the 5 remaining material, such as his notes, interview notes 6 7 from him. That would be the only thing. THE COURT: All right. Defense, any other 8 remaining issues? 10 MR. COOMBS: I don't believe so, Your 11 Honor. THE COURT: I have the email from the 12 13 I asked the Defense to provide the Court a 14 written filing over the weekend. And the Court will 15 consider the filing, as well as cases provided by the 16 parties. 17 And we'll have oral argument on this motion 18 on Monday morning. And the Court will issue a ruling -- this witness isn't scheduled to testify until 19 20 Wednesday, so the Court will issue a ruling in advance

21

of his testimony.

```
Is there anything else we need to address
1
2
    before we call the witness?
3
                MR. FEIN: No, Ma'am.
                THE COURT: Does either side wish to add
4
    anything further to what we discussed in the RCM 802
5
6
    conference?
7
                MR. COOMBS: No, Ma'am.
                MR. FEIN: No, Ma'am.
8
                THE COURT: Please call the witness.
9
10
                CAPTAIN MORROW: Your Honor, United States
    calls Rear Admiral Kevin Donegan.
11
12
    Whereupon,
13
                  REAR ADMIRAL KEVIN DONEGAN,
14
    called as a witness, having been first duly sworn to
15
    tell the truth, the whole truth, and nothing but the
    truth, was examined and testified as follows:
16
                 EXAMINATION BY CAPTAIN MORROW
17
18
    BY CAPTAIN MORROW:
                Sir, you are Rear Admiral Kevin Donegan,
19
          Q.
20
    Director, Warfare Integration Pentagon?
21
          Α.
                That's correct.
```

- Q. Sir, how long have you been the Director of Warfare Integration?
 - A. A little over a year.

- Q. And what is Warfare Integration?
- A. Warfare Integration is a position on the Navy staff where we integrate the budget of four of our Warfare areas into what would be a cohesive plan so that we can get the best and most for our money. It's responsible for about a \$90 billion a year portfolio.
- Q. And, sir, what are your general responsibilities in that position?
- A. I oversee -- I coordinate with four specific warfare areas to take their individual portfolios where they balance their budget, but then bring them in and work across the entire Navy to ensure that we will get, when we put it all together, the best force that we can get. So that effort takes a lot of back and forth and coordination across a large staff.

THE COURT: Before you continue. You said you coordinate with four warfare something. What was the "something?"

THE WITNESS: Warfare areas. So maybe we 1 2 break down our portfolios by warfare, aviation warfare 3 and surface warfare would be another for instance. THE COURT: Thank you. 4 BY CAPTAIN MORROW: 5 Sir, prior to taking the position as 6 7 Director of Warfare Integration for the Navy, where were you assigned? 8 9 Α. I was assigned to U.S. Central Command as the Director of Operations. 10 11 0. Is that the J3, sir? That is called the J3, that's correct. 12 Α. 13 Q. And, sir, how long were you in CentCom J3? I was a J3 for a little over two years. 14 Α. 15 Q. So approximately May 2010 to June 2012? Α. That's correct. 16 17 And, sir, broadly what were your 0. 18 responsibilities as the Director of Operations? They are relatively large. The CentCom 19 Α. area of responsibility is 20 countries and extends from 20 21 Egypt all the way through the Kazakhstan and includes a 1 large portion, as you know, of the Middle East, with
2 the exception of Israel.

- And my job as Director of Operations was to be responsible for the directing operations across all those countries, and particularly, in addition, we had two areas of hostility for a majority of the time that I was there, one in Iraq and one in Afghanistan. So we would also be responsible for the direction of operations in those areas, although we had to do that through another four star commander that was subordinate to us.
 - Q. Sir, in the places where there weren't geographic commanders, for example, Iraq and Afghanistan, what was CentCom's role and what was your role in particular as a J3 in those areas in terms of overseeing operations?
 - A. I wouldn't call those geographic commanders. They were commanders of task force or operations. CentCom is the geographic commander.
- We would also oversee operations in all the other countries running from security cooperation,

humanitarian assistance, disaster relief to counterterrorism operations. And they run the gamut. So each of those countries we would have varying degrees of levels of operations, some train and assistance, security force training with other countries, some direct partnering with them and counterterrorism operations and depending on what country is the depth and level of operations we would

be.

- Q. And, sir, with respect to Iraq and
 Afghanistan did your travel forward at all as part of
 your responsibilities for operations?
- A. I did. We had a forward headquarters based in Qatar and I, probably every two months, certainly not than less every three months, I would go forward to base headquarters for an operation, exercise and then move typically when I was there I would visit either Iraq, Afghanistan, Yemen or some of the other countries that we have our operations --
- Q. And, sir, are you here today to discuss the impact to operations within the CentCom AOR that you

- observed as a result of the unauthorized release by
 WikiLeaks, information by WikiLeaks?
- A. I am.
- Q. Sir, we'll get back to your time at CentCom later. I would like to talk about your career a little bit.
- 7 How long have you been in the Navy?
- 8 A. About 33 years.
- 9 Q. Sir, what was your functional area; what 10 were you doing?
- 11 A. I'm a pilot. I'm specifically an F18 pilot 12 is how my career started out.
- Q. Sir, what can you sort of give the Court a flavor for your command assignments, your operation assignments.
- A. I guess, we don't necessarily specialize as
 flight officers but we follow different career tracks.

 Mine has concentrated pretty much on operations,
- 19 control of operations throughout my tenure.
- I had commands of four organizations from a strike fighter squadron up through multiple carrier

task force.

- Q. Sir, what about other operational assignments, joint operational assignments, other than that?
- A. I was -- I worked on the staff of a NATO command in Europe. And then was also in Bosnia working for the United Nations Protection Force coordinating their NATO air operations support before we had U.S. troops there.

So I was forward direct to what was then Sarajevo, which was not an embargoed city at the time.

- Q. Yes, sir. In your command assignments did you have the opportunity to deploy to CentCom AOR --
- A. In each of my ship going assignments I deployed to the CentCom area of responsibility in almost each of those. So the majority of my forward deployed time, if I wasn't in the Pacific, I was in CentCom area of operations.

When I was command, my forces supported

Iraq and Afghanistan directly, our operations in Iraq

and Afghanistan.

Q. Yes, sir. Can you describe the process to be selected as the J3 at CentCom?

A. Since it's a joint position and relatively important, each service submits a nomination, a two-star general, a flight officer nomination to the joint staff for the position.

And then your records are reviewed and then you are selected in a process the joint staff uses for to up to the CentCom commander who he chooses as J3.

At that time it was General Petraeus.

- Q. Sir, who are the other CentCom commanders you worked for as your job?
- A. General Petraeus was who was there when I got hired. Then he after some months went into Afghanistan and took over our subordinate command in Afghanistan, which is U.S. Forces Afghanistan and staff commander.

When he did that, the Deputy Commander,

General Allen, took over as the Commander of CentCom, I

think it was about four months, until General Maddox

came in to take over as Director of CentCom. So the

- 1 lion's share of my time was working for those three
 2 individuals.
- Q. And, sir, approximately how many individuals were on your staff as the Director of Operations?

- A. The staff just in the CentCom headquarters was probably about 300. But we had liaison officers in other parts of our organization around. So I would say about 300 direct reports.
- Q. And, sir, could you describe the operational tempo at CentCom headquarters when you were the J3?
 - A. Yeah, that's pretty easy. It is very fast paced and busy, and still is to this day, as you can imagine. At the time that I took over as the J3, of course, we had ongoing options in Iraq.
 - At that time we were -- we had about 100,000 troops in Iraq and we were then building some plans to draw down to 50,000 and eventually zero. We had a significant contingent in Afghanistan. During my time there we plussed that up with the surge and

subsequently began a drawdown of those forces.

And with those operations going along, they be consuming but in addition we worked the operations across the AOR. So a typical day would be around 7:00 a.m., intel ops meeting that we have with my counterpart, which is the J2, where we go through all the operations that happened in the past and what are ones are that are planned in the future and how we are going to mutually support those.

And then I'll go through a series of meetings that are teleview conferences with either people down range, Washington, very high levels in Washington, where we are gaining approvals and authorities to conduct future operations or giving status reports on current operations.

We have daily meetings with the commander, if he's in the headquarters. If not, we would have some contact with him throughout the day.

In that face we go like that through quite an extensive workday. And then because there is a time zone change, the downrange AOR is waking up about the

time we are going to bed here on the East Coast.

So when I would go home, I have the same communications suite in my home on the air force base as I did at headquarters. Because the network basically continued. I didn't get much of a break and certainly didn't get much of a break on the weekends.

- Q. Sir, so you would stay in constant contact with the operations folks even when you were home?
- A. Yes. As a matter of fact, I would have weekly scheduled televisual conferences with the operations folks in Iraq and Afghanistan and my other subordinate operations.

And then, throughout the day, almost daily,
I would be contacting them or they would be contacting
me for the support they needed for plans that we were
working on, for future plans, or some updates on
current ops.

And then you're always going to get surprised because that is the only certainty in CentCom, is biggest surprise. In our case it could be a flood relief efforts in Pakistan to the Arab Spring

beginning and happened to reinforce an embassy in
Egypt.

- So those things are not scheduled. And anytime there would be a moment of free time you generally, there's something you didn't plan for that or that you had planned for and you have to break your plan out that occurs.
- Q. Sir, can you describe just very briefly sort of the difference between current operations and sort of J5 or further plans?
- A. Sure. On headquarters staff there is probably -- the core team that works in support of the Central Command Commander is the J2 to J3 and the J5.

 J2 does intelligence and J3 does current operations and future plans but held through one year.
- So my plan team worked on all future plans out through one year and took the baton pass from J5 for the longer range plans at the one year point.
- So if there was anything we were doing or going to do within a year, then we were either planning it or executing it. And in terms of the J2, that's a

- very close tight team. Because we are mutually
 supporting -- they have to know exactly what our game
 plan is so they can support us with the best
 intelligence that we possibly had. And also team with
 us in building our plans.
 - Q. Sir, can you describe how the staff would support you when you were sort of at home or otherwise not necessarily in the headquarters?

A. I have a full watch team that's 24/7, mans a joint operations center. That's overseen by an 06 Commander, or a senior, that manages the daily business of both reports we get in but also tracks the current ops that were going in the direction that we had planned for.

And then, when we had those other events that I talked about, we will build a separate watch team. Sometimes we call them a CAT team, Crisis Action Team. It's a flood relief in Pakistan, we have Crisis Action Team stood up managing that. If there was an uprising in Egypt and we were managing our support of the Embassador MC we have a Crisis Action Team

supporting that. And if we were doing particular counterterrorism operations that were directed to income levels, a team, separate team working that, and they are called (inaudible) which is just a room where we do the sensitive operations.

- Q. Sir, did the crisis, when you had to set up a Crisis Action Team, was that out of high or did you have people that came in?
- A. No. But that is kind of a double duty thing. The watch team is on a certain rotation. But will pull them in to a higher cadence to support those teams.
 - Q. Sir, can you describe briefly how well you and your staff were in the planning and execution operations in Afghanistan and Iraq, how that interaction worked?
 - A. Yes. Depending on at the tactical level clearly the four star commander there is going to do his plans. What we would do is provide them overarching guidance and direction by developing a broader plan. And we would integrate with other

entities that may be armed in their -- well, area of hostilities.

For instance, areas in Afghanistan have to be closely coordinated with ongoing operations and work we are doing in Pakistan. But that Pakistan element isn't in direct control of the commanders of the forces. So we would cross the boundary there to help them with integration. Or to get them approval authorities and, that they would need to execute particular operations.

When we are doing buildups and drawdowns we also spend a significant amount of time ensuring they have the right forces at the right time and the things they need, whether that be support in the fights that they are having with counter-IEDs, support with ISR, new technologies, all the way through to ensuring that we help them in coordination with some of our allies and partners in load sharing in some of the missions.

Q. Sir, aside from the theaters in Iraq and Afghanistan, what was CentCom's primary focus operationally during the time you were --

A. Well, I wouldn't say our primary focus. We had multiple lines of operations we are doing. Some of the areas of focus is that we had security cooperation with other countries. One of those that was in the forefront of our minds all the time was counterterrorism operations.

So across many of the countries in our AOR we teamed with different levels and different degrees with the countries in that counterterrorism fight.

Some countries we worked, we trained members of that country and other countries worked with their forces.

But in all cases we are working through these other countries. In some cases it was just information sharing of intelligence information and operation TTPs. So we are extensively building a network as counterterrorism operations across all those boundaries.

Q. Sir, I want to transition now to the release of information from the CIDNE database. I assume you became aware at some point, July 2010, release of SigActs from Afghanistan?

A. We did. We were very much attuned to that release of information.

- Q. And, sir, how did your staff, just very briefly, how did your staff use SigActs in the products that are used by the J3?
- A. It's probably good to explain what the CIDNE database is a little bit as part of that. The CIDNE database are files, it's just a name, really think of it as a big hard drive. It's just where we store all, a lot of our information operational intelligence information at CentCom. And the SigActs is sub-portion of that. SigActs means significant activities.

And A significant activity could be something as small as a singular event, like a small arms fire in a particular area. Or something as large as a major milestone in an operation or an event that wasn't planned, or an operation that was either going as planned or not as planned.

So basically just consider it a wide ranging look at all the operations that would be going

on in CentCom. It's the basic core pieces of the way we transmit back and forth between our headquarters and subordinate command and share all the way up through Washington events that are going on so that everyone can track the current situation.

We augment that with other information, televideo conference, other communication networks to fill in the blanks. And typically the SigAct is the core piece of information. With that maybe will also come very high definition maps and photographs and files that are attached that further describe the event.

Could be, like I said, a small arms fire, an IED event, could be the milestone in a current operation or it could be a crisis action event, like a missing soldier or something like that. All reported through that system.

If you were to look at it, basically looking at the play-by-play of what's going on in CentCom. We call it, each of those would be what we call ticktock, time on the clock in the event and they

can be pages long of information.

- Q. Okay, sir. And when you learned that

 WikiLeaks here released information from the CIDNE

 Afghanistan database, were you at least initially aware

 of what had been released?
 - A. We didn't have an initial sense. We knew the scope was large. We didn't have the sense of exactly what information. So, as with any one of those things I talked about before, we stood up a Crisis Action Team that the specific job was to evaluate if we had current operations, positions, people vulnerable to exploitation by the enemy because of the release. And your first step is to take a look, is there something that can be immediately used by the enemy against our forces.
- Q. And, sir, you said you stood up a Crisis
 Action Team; is that correct?
- 18 A. Yes, at the CentCom level.
 - Q. And do you recall approximately how many individuals on your staff working because of that?
 - A. Well, it was a combined J2/J3 team so it

- was a rather large team. Typically in the room at any one time were probably between 10 and 20 people in there working on that team. And also reached out remotely to, some people don't have to leave their desk to support the team. They are given an assignment and they do their assignment from there and they are feeding that into the team.
 - Q. And, sir was that a 24/7 operation?
- A. It was.

- Q. Do you recall how long the Crisis Action
 Team was in place?
- A. Well, we dealt with the WikiLeaks thing for my entire tenure in CentCom. But the Crisis Action portion, what we were initially looking at was ongoing operations that could possibly be compromised, any TTP that that we would want to immediately alter because it was compromised. Locations and maybe physical security related to those location.
- So for that portion of the look, which didn't get into the people portion, in other words, whether those be sources or other individuals probably

took several weeks. I don't remember exactly.

- Q. If the SigActs only went through December of 2009, why were you concerned about potentially operations in locations that might be (inaudible)
- A. Operations in CentCom aren't done in small bites. They are generally part of larger plans. And SigActs, to put things in context, will talk about a particular event, but it will also put in the context of a larger operation.

So in that SigAct can be, even though I think actually some of those SigActs went, at least through the end of 2009, and we are now in the July timeframe of 2010, clearly went and were in the period of operations that we were doing then.

In addition, locations, physical locations that we were using absolutely would have been the same. Some changes to them, but in a general sense the physical security, details that are described and locations we are using, would be pretty static. They probably did not change in that timeframe. And most of the TTPs described in there, how we got information

- 1 would not have changed also.
- 2 So that evaluation was important to do.
- Even if he couldn't change it, we needed to know where our vulnerabilities were.
- You have to think of Afghanistan as having
 a lot of remote locations, some are FOBs and well
 understood, and the enemy know they are there. Other
 places we may use as bases or locations that may not be
 - And you can understand that we would not want, that that look was to ensure that some of those locations were not compromised. So we wouldn't, in a current or planned operation ongoing, step into a potential danger zone because we are visiting a place that the enemy now knows we are using.
- MAJOR HURLEY: Ma'am -- 1000(b)(4).
- 17 THE COURT: Noted.
- 18 BY CAPTAIN MORROW:

so understood.

Q. Sir, at any point did you or your staff
become involved in the process to notify individuals in
Iraq and Afghanistan that may have been made public or

compromised in the SigActs?

A. Absolutely. We teamed now with the J2 organizations, which stood up a task force that went well outside the CentCom headquarters to identify any source -- source term that we used for this piece was a name that could be identified as an individual that had connection to the United States in terms of passing information to.

So once we determined that there was a significant number of those names, the task force stood up to define them and categorize them and then also help us --

- Q. Are you speaking of the RITF at this point?
- A. I am. And the RITF's function, I wasn't on it, but we coordinated with that team. When I say I wasn't on it, my team contributed to that team. I personally was not on the RITF. They were in a different organization. They are a different organizational structure. We teamed with them. That's what I mean.

The RITF helped us to identify not only the

names of these folks, but their last known location,
what risks they were assessing these people to be
under.

And then we turned around and issued two fragos, one to U.S. forces in Afghanistan and another one to U.S. forces in Iraq which, referred to as a duty to inform, but was really an order that told them so that we can continue to have and maintain, to maintain the current sources we have and to continue to gain future sources that we had to go inform the people that we could contact that their name was on this list and that they were potentially in jeopardy and some of them in danger of retaliation from the enemy.

We also did it because we had moral and ethical responsibility to make those notifications.

- Q. Sir, who issued these fragos?
- A. I did. They were released under the private Director of Operations, which was me.
- Q. And, sir, what was the direction with respect to the actual tactical level execution of these operations from the CentCom?

A. It was pretty clear we had to do two things; we ordered them to, based on the category of how we laid these out according to the RITF, we had to inform these people their name was on this and, therefore, the enemy likely had access to knowing they were -- that they had -- or a source to the United States and they would likely be in danger.

- And then they had to come back to us on when they made the notification, how they made the notification, if they didn't make the notification, why.
- Q. You said they had to come back to you. Can you describe how those missions were tracked?
- A. We tracked them to the RITF team. So the J2 track and force and reported them, they kept the database for us. They were the housekeeper of the information.
- We also, it wasn't just people in

 Afghanistan. We expanded it to also include villages

 because there were village names listed -- and I don't

 want -- for those that haven't been to Afghanistan, but

the villages -- each area of Afghanistan has a shadow Taliban governor associated with it. And villages in and of themselves were cooperating with either the coalition or U.S. forces can be retaliated against by the Taliban.

- And as a result, in some cases we had to notify villages. So not an individual, but the village either let us use some facility in there or helped us in passing information, however it was described. So we were sensitive to the villages also.
- Q. Sir, do these (inaudible) impact operations at CentCom headquarters in Iraq --
 - A. I'll take that in two parts. CentCom headquarters and beyond, absolutely. Because standing up a task force that you just talked about is very consuming. Standing up a Crisis Action Team that I talked about was consuming. And then this is all additive. We are trying to manage all those operations I talked to you before with the same team. We have layered on a new mission, not just for the headquarters. So now, when it gets down to the

- commanders on the ground, eventually soldiers have to 1 notify these people. 2
- 3 Now we did that when we can with our partners. But this was the U.S. Order, not an ISAAC. 4 So we worked to notify these individuals with whatever 5 missions that the commanders on the scene determined 6 7 that they had to do that.
- Maybe I should give you a little time 8 perspective on this. This was not a small operation. 10 We issued the initial order to Afghanistan, I believe, in August of '10. We didn't get the final reported 11 until May of '11. 12
- 13 So that's a length of time it took to work 14 through this list. And I can give you more specifics on the numbers. But they are classified in terms of 15 16 the numbers, size of it.
- 17 MAJOR HURLEY: Captain Morrow, excuse me. 1000(b)(4).
- 19 THE COURT: Noted.
- 20 BY CAPTAIN MORROW:

21 Q. Sir, I would like to transition to the

- 1 release of purported Department of State cables by
- 2 WikiLeaks.
- 3 Do you recall becoming aware of that
- 4 release of that information in the
- 5 November-December 2010 timeframe?
- 6 A. I do.
- Q. And without getting into any specifics, did
 you observe any impact to CentCom operations as a
- 9 result of this release?
- 10 A. There was absolutely impact as a result of
- 11 the release of those cables, purported leaks.
- 12 CAPTAIN MORROW: Ma'am, at this time we
- 13 move to a closed session.
- 14 THE COURT: Go ahead.
- 15 EXAMINATION BY MAJOR HURLEY
- 16 BY MAJOR HURLEY:
- 17 Q. Good morning, sir.
- 18 A. Good morning.
- 19 Q. Sir, let's talk about SigActs for a second
- 20 All right? And, sir, whenever I ask you questions, if
- 21 your inclination is just to answer yes or no, you still

- 1 have to answer aloud to the court reporter.
- 2 Α. Okay.

8

10

11

12

14

- 3 0. Thank you. Sir, inclusive in your testimony on direct was that SigActs often don't 4 provide all the information an individual needs to 5 assess what happened, correct? 6
 - It depends on -- that's not a yes or no It absolutely depends on if it's a simple answer. incident or more complex incident. In some cases it's pretty clear that the SigAct covers all the pieces of information you need to know.
- In others, because the situation is 13 evolving or more complex, there may be amplified information that we need to gather from whoever is making the report.
- So you have to fill in the blanks 16 Q. 17 sometimes?
- 18 Α. We do sometimes.
- 19 Q. Do SigActs tell you what happened at a specific location? 20
- SigActs build on each other. So one 21 Α.

- individual one may not tell you all. It may have started and then it may be 5 or 6 that tell the whole story.
 - Q. Yes, sir. But either you need those other SigActs or perhaps other information to understand completely what had occurred or what was described in the SigAct; is that right?
- A. That's correct. WikiLeaks though, the
 SigActs filed, ones that were tied to each other were
 there. So you just had to go backward or forward in
 the files to find them.
- Q. Yes, sir. But the other amplifying information wasn't there?
- 14 A. There were pieces that weren't there,
 15 that's correct.
- Q. So my next question, sir, SigActs, just this is a generalized question, SigActs tell you what happened at a specific location and time?
- 19 A. They do.

5

6

7

Q. And SigActs aren't forward looking, correct, sir?

A. They often are. And the reason that they are is because they may be telling you there will be a significant activity report, but it may be talking about a phase in an operation that will refer to a future phase that's coming up.

- Which is why we had to go back and look
 hard at these SigActs. So the answer to that question
 is, no, I guess, because they are forward looking in
 some cases. If it's part of a larger operation, they
 typically have enough information that puts the
 operation in context and talk about the next phase.
 That SigAct may jeopardize the next phase or set up the
 next phase.
- Q. Yes, sir. SigActs themselves don't state doctrine, correct? Let me give you an example. SigActs don't say, if the enemy does one X, then we are going to do Y?
- A. SigActs may refer to some doctrine, and especially if we deviated, from deviated doctrine or followed doctrine. But doctrine can easily be deduced from them, because you just have to track down from

one -- (inaudible) two or three SigActs you have the TTP.

- Q. Now, sir, my understanding is that a source the expression source is a term of art. Is that accurate?
- A. Depending on who is using it. It may have different connotations to an intelligence person. And for the terms of WikiLeaks, we identified, for the RITF identified and made a definition for source that we would use that it was, I don't recall exactly the language they used, but it basically meant if there was a name there that could be tied to cooperating with the United States, that would be called a source for the WikiLeaks piece.
- Q. True intelligence sources, they are not captured in information by their name, correct?
- A. In the SigActs you would not identify someone as a human source. That would require a higher level classification. However, there were sources that were in WikiLeaks. In other words, there were names that were also, now source is the word, specific

- 1 individuals that fit much higher intelligence
- 2 classification definition that were listed there. You
- 3 just wouldn't see that associated next to their name in
- 4 the SigAct.
- 5 Q. Because we are managing them as a human
- 6 intelligence source in this situation, they would be
- 7 listed by number?
- 8 A. That's correct. Any of the names though
- 9 it's not about whether they were a direct source or
- 10 not. It was if they were associated cooperating with
- 11 the United States puts them in danger.
- 12 Q. Human reports are part of the CIDNE
- 13 database, correct?
- 14 A. There is human pieces and strains that are
- in the CIDNE database. It may not tell you who it came
- 16 from.
- 17 Q. And that's separate and a part from the
- 18 SigAct --
- 19 A. No, it can be right in the SigActs.
- 20 There's several events that are ongoing that have a
- 21 line of information. And it's clear in the context

- that that line came from a human source. It just won't
 tell you where.
- Q. There is a human section in the CIDNE database?
 - A. There is. May be the higher classification. I can't say exactly in the CIDNE database. May be in higher classification. Separate from SigAct is what your question was.
 - Q. Yes. And SigActs captured the names of these individuals or individuals names were in the SigActs, right?
- 12 A. Absolutely.

6

7

8

9

10

11

16

17

18

19

20

- Q. And their name could be listed there just as a result of single interaction with an individual that was described in the SigAct?
 - A. That's correct. And that may be all it takes to have an association with cooperation with the U.S. is where the danger would come in.
 - Q. And these individuals, these contacts, they can be people friendly, they can be people disposed to like the coalition forces and to want to participate in

their activities?

- A. Well, the whole purpose of my fragos that I issued was to be able to have trust built up that let more people want to continue cooperate with us and work with us and the coalition.
- Q. So I guess ultimately my question is, these individuals that are listed in the SigActs, they can be friendly?
- A. Yes, absolutely.
 - Q. And they can also be people that are potentially unfriendly to coalition forces, just individuals that were taken note of in the course of interaction?
 - A. Some would be unknown, that's correct.
- Q. And there's no way of discerning that, as you just looked at the data itself, correct?
 - A. It depends on the specific SigAct. You would have to read it. Sometimes it attributes information we got from some of the people and has to be the reason the next step was taken.
- Q. These names in the SigActs, in the

- 1 purported SigActs --
- 2 A. That's why we did that classification in
- 3 RITF to help get to that point. We wouldn't go out
- 4 there and notify one of the bad guys that is name is on
- 5 the list. Does that make sense?
- 6 Q. It certainly does.
- 7 A. That's why I produced some of the names on
- 8 the list.
- 9 Q. Those names, sir, in these purported
- 10 SigActs, they were in English?
- 11 A. No. Well, they were written in English on
- 12 the SigActs, but they weren't English names, if that's
- 13 what you mean.
- 14 Q. Yes, sir. I guess what I'm saying is, they
- were typed up using the alphabet?
- 16 A. That we use.
- 17 Q. And spelled by the individual actually
- 18 putting in this information into the CIDNE database?
- 19 A. Again RITF did their homework by going back
- 20 and looking at each of these to identify is this a
- 21 person that we can put our finger on and which one is

- it. By putting the other pieces of clues together that
 were in the SigAct and other known intelligence
 information to identify so we could get it down to a
 specific person.
- Q. Who put that information, the name of this person into the CIDNE database?
 - A. Whoever was writing the report.

- Q. And that person ostensibly speaks English uses the English language?
- A. In some cases. In other cases they could be (inaudible) speakers. They could be right there with the interpreters with them as they are filling it out. Depends what public report is being filled out.
- Q. But the report is ultimately intended for an English --
 - A. English speaking audience; that's correct.

 But if you can imagine, in Iraq and Afghanistan

 identifying names and people is really important. So

 when they do that, they don't take that duty lightly.

 It's much like -- so if you are going to put a specific

 name in there, you are generally going to do the

homework to make sure it's going to be traceable.

- Q. Well, there a lot of different English spellings for Mohammed, are there not, sir?
 - A. There are, but not in that location in that particular part of Afghanistan. There will be enough other supporting information to actually help us identify which person it is and then which tribal element that he may be attached to.
 - So you can start to get down to -- we have been at war in Afghanistan for 10 years, so we have this part --
- Q. So you would agree that there is sometime difficulties in translating these names back and forth?
 - A. For us to read, but not for the intel community to help us figure out who they are.
 - Q. So it's your testimony that those names are likely to be accurate and understandable as they are translated back and forth to these languages?
 - A. The preponderance of them we were able to identify and associate them with -- so, yes, in answer to that question, I believe -- I'm certain there are

1 some errors in that.

8

10

11

- But when we did this, announced this in a

 task force can give you more specifics, but we

 categorized them by different levels A-B-C to sift out

 any errors or problems there would be so we would not

 be notifying someone that didn't exist or trying to

 notify someone that didn't exist or trying to notify
 - Q. Yes, sir. Let's talk about the duty to warn that you discussed with Captain Morrow during your direct examination.
- A. We called it a duty to inform. But that
 was an abbreviated title. Regular had a different
 title. I can't recall exactly what it was.

somebody that wasn't on our team.

- Q. Sir, I'll just call it a duty to inform.

 Those are orders issued by you at CentCom Headquarters?
- 17 A. They were.
- 18 Q. One for Afghanistan and one for Iraq?
- 19 A. That's correct.
- Q. And, as you testified -- just one second -
 just to summarize your testimony with Captain Morrow,

- you indicated there were two things that the subordinate organizations had to do. The first was to inform the people where they could; is that right, sir?
- A. Yes.

- Q. And the second was to inform, the reporting task that you gave back to these organizations was, inform when the contact was made, how the contact was made and if there was no contact, why there was no contact?
- A. And I may not have those exactly right.

 That's the general tryst of what the frago said.
- Q. Sir, there was other language in the frago, specifically there was instruction to, from you to the subordinate organizations to mitigate the risk?
- A. Well, in the frago the way it said was, evaluate the risk. I don't know that mitigate was the point that we made. It's up to the commander on the scene to determine the level of risk he's willing to accept in carrying out the operation.
- So in all cases those commanders worked to mitigate risk to the lowest level possible for any

- 1 operations.
- Q. Absolutely.
- A. But in some cases there may be someone
 that's in such a location or some other reason he can't
 get the risk of that notification exceeds that which
 the commander would be willing to accept for that
 potential value gain. That's up to that local
 commander. He would report to us if he couldn't do it
- Q. That was part of his reporting requirement was to explain that back?
- 12 A. Yes.

any longer.

- Q. Through the chain. So let's talk about
 evaluating risk is perhaps intuitive, but let's walk
 through those steps.
- In evaluating risk, first you assess a situation, correct?
- A. Risk has three levels the way that we looked at it in CentCom. One is, there's a value of risk. It's some level you apply, high level, high, medium, low, however you want to parse that out. And

- then risk to a specific thing. Is it to the force or 1 2 mission, or both. In some cases it's both. And the 3 risk has a duration. How long is the risk for? For a mission it may be the length of the mission or may be 4 for sometime afterwards, if it's some other event. 5 6 So risk is very complex -- complex piece. 7 And, as you can imagine, there's an inherent level of risk just being in Afghanistan. So you are starting at 8 that level.
- Q. Yes, sir. And you left it to the individual commanders to make that decision considering the risk, as they analyzed it?
- A. As we always do.

15

16

- Q. As you indicated implicitly I think in one of the responses to my question, sir, the responses that you received from the subordinate commands fell on a wide range. Is that right?
- 18 A. What do you mean by that?
- Q. Well, let me give you the categories, as I
 understood them. First, there were instances where the
 person was warned?

1 A. Right.

5

8

10

11

12

13

14

15

16

17

18

19

20

- Q. And not only the person, but if it was a larger group, whether it was family or even a village that group?
 - A. That's correct.
- Q. And in other instances the person was not warned. Is that right?
 - A. That's correct.
 - Q. And then the third set of responses that you received back were, was the response to indicate that subordinate commander didn't look and he listed out his reasons why the search was not conducted?
 - A. Well, I don't know that he didn't look.

 Afghanistan is not like here in the United States.

 There is not a street address that we can go to.
 - So information about the individual -- it's not simple to find an individual for all the reasons, so that's what increases risk in these operations.

 You're not walking up to a door in the street saying, hey, Mr. Smith, want you to know your name is on the list.

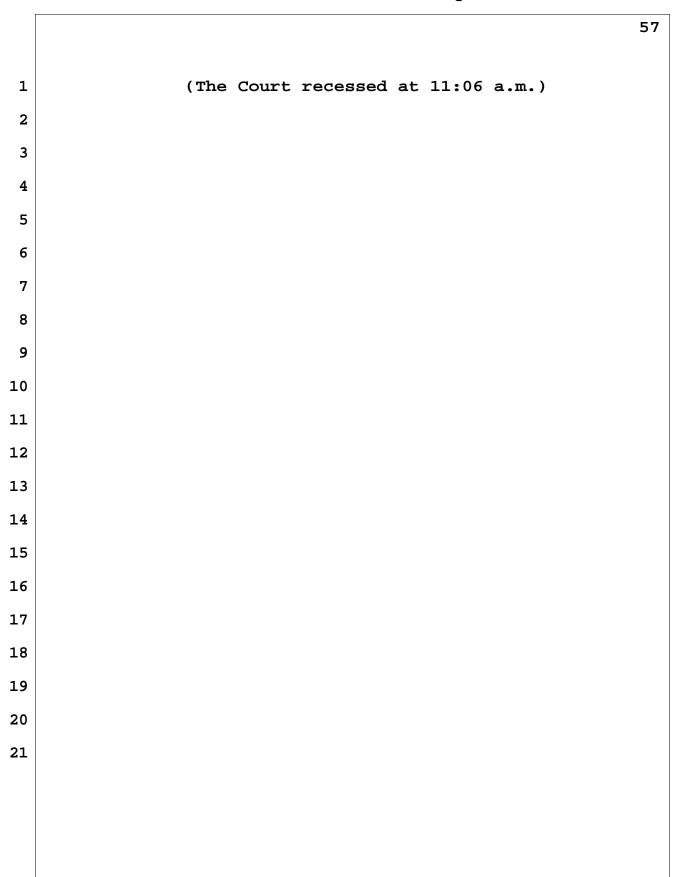

- We maybe didn't have an operation going to that village. Maybe our presence going to that village can be a problem, we may have to mount an operation to go to that village. So there may be normal patrols through there. You have a full range of what could be going on. Or the Afghans may be able to notify the person. So we would explore all the means that we had.
 - Q. All the options?
- A. That's correct.

- Q. One thing that subordinate commanders would do to mitigate the risk would be to synchronize this notification with whatever ongoing operations they had?
- A. If possible, absolutely. That was the routine patrol piece.
 - Q. And, sir, you were in a position to receive these responses from the field?
 - A. These responses came in through the J2 team. We tracked them in a similar database so that we could do accounting. Now we are accounting -- we are certainly not going to question the commander for what they did or didn't do. We were merely making sure they

- followed the intent of the instruction until we got to 1 2 closure. 3 0. Sir, did you ever see a report where there was a coalition forces casualty that was incurred as a 4 result of executing this duty to inform mission? 5 6 Α. No. I wouldn't have expected to see one in 7 any way because of the, what I just talked about, that in almost all cases, not in almost all cases, but to 8 make that direct connection would be very hard to make because of the complexities of Afghanistan. 10 11 MAJOR HURLEY: I have nothing further, Your 12 Honor.
- 13 THE COURT: Redirect?
- 14 CAPTAIN MORROW: No, Your Honor.
- 15 THE COURT: All right. Members of the
 16 gallery and the public, we are going to proceed into a
 17 closed session. Before we do that let's talk about we
 18 have another witness coming today. I assume we are
 19 going to have another witness testify today.
- MR. FEIN: Yes, Your Honor.
- 21 THE COURT: There are some additional

```
administrative things that need to be done over the
1
2
    lunch hour. So what time do you think is reasonable to
3
    inform the public that we will be coming back on the
    record. And please, again, think. I don't want to, to
4
    the extent we can avoid it, extend it by 15 minute
5
6
    increments. So go long.
7
                MR. FEIN: Can we have a moment, Ma'am?
                THE COURT: Yes.
8
9
                CAPTAIN MORROW: Your Honor, we recommend
    1500.
10
11
                THE COURT: Members of the public, we are
12
    going into closed session and we will be reconvening
13
    1500 or 3:00 for the next open session that we will
14
    have today.
15
                MR. FEIN: And, Ma'am, (inaudible)
                THE COURT: Is there anything else we need
16
17
    to address before I recess the Court?
18
                MR. FEIN: No, Ma'am.
19
                THE COURT: All right. Rear Admiral
20
    Donegan, please do not discuss your testimony with
21
    anyone during the course of the recess.
```
